SUMMARY

Dynamic Software Developer skilled in Java, JavaScript, React.js and SQL. Committed to crafting problem-solving, real-time solutions that drive engagement and efficiency. Committed to continuous learning and adept at thriving in dynamic environments.

PROJECTS

SmartShopStop (E-Commerce Website)

November 2023 - December 2023

· Well-structured layout with HTML ensures easy navigation for users.
· CSS styling enhances the visual appeal, providing a professional and engaging appearance.
· JavaScript adds interactivity and functionality to the website.
· Seamless product browsing, selection, and checkout process for a smooth user experience.

Car Dekho

May 2023 - June 2023

· The project is a backend application designed to manage car-related data, such as car models, specifications, and other related information.
· Backend Framework: Hibernate, which is an Object-Relational Mapping (ORM) framework.
· Database: MySQL, a relational database management system.
· The primary functionality of the project includes CRUD operations:
· Create: Allow users to add new car data to the database.
· Read: Enable users to retrieve information about cars from the database.
· Update: Provide the ability to modify existing car data.
· Delete: Allow users to remove cars from the database.

Booklx (E-Commerce)

October 2020 - February 2021

· Users can create book listings by uploading pictures of the books they want to Sell.
· Booklx makes education more affordable and sustainable by promoting the reuse of books.
· It serves as a marketplace for students and book enthusiasts to trade their books.
· Each listing includes details such as the book title, author, condition, and price.
